

Instructions for using

PHP Webcams Template 01

Copyright 2008 www.freewebtemplates.me All Rights Reserved.
Reproduction and/or distribution without permission prohibited.

Template Name: **PHP Webcams Affiliate 01**
Template Source: <http://freewebtemplates.me>

It may useful to print this manual.

Warning: Please use a **plain text editor** such Notepad to edit this template (or any other template from www.freewebtemplates.me). Do not use WYSIWYG (What You See Is What You Get) editors or they will make unauthorized changes to the code and your site will not work. Only use a plain text editor.

Unzip The Package

You will need to unzip **php-webcams-affiliate-01.zip**. If you don't have a zip utility, there is a free one available at: <http://www.zip995.com>

After the package is unzipped, you will see 2 main directories:

demo-package and **template-package**.

Requirements

You will need to have PHP installed on your adult web hosting account.

Create A Demo

Upload the contents of **demo-package** to your server so you can see how it works. The demo pages will display real webcam listings. After you have seen that it works, continue along with the following instructions. If it does not work, contact your web host.

Affiliate Data Feed URL

You will need to login to your Webcams affiliate account in order to get the required data feed affiliate codes to put into your pages.

If you are not already a Webcams affiliate, please join through the following link:
<http://webcams.com/affiliate/?ref=edcams>

Template Package Contents - **template-package**

This template package contains the following files and directories:

- template.php
- category-template.php
- model-template.php
- inc/header.php
- inc/footer.php
- inc/listings.php
- inc/models.php
- inc/style.css
- webcams/list.php
- readme.txt

template.php

Use this template to make general pages such as index.php and other pages as required.

category-template.php

Use this template to make new Webcams category pages with listings of webcam girls.

For example, if you want to create a category called “Blonde Webcam Girls”, you would make a copy of this template and name the file blond-webcam-girls.php, or blodes.php or whatever you want..

Next, you will need to get your affiliate code and paste it into each newly created page.

How To Get Your Affiliate Code and Where Exactly To Paste It

Login to your Webcams affiliate control panel and go to the **Promo Tools** page:

Then scroll down the page and click on the **Models RSS Feeds** link:

Setting Model RSS Feed Parameters

You will now be at the page where you can get your affiliate link which will be pasted into the your web page.

Select any category:

1. Category **Select a Category**

- Big Tits
- Black Girls
- Blondes
- Bondage
- Brunettes

In this step, you must select **RSS Feed profile**:

2. Link to **Select RSS Feed profile**

- Default Webcams.com profile
- RSS Feed profile

Do you want your website visitors to access Free Chat with the model or not:

3. Model Free Chat Guest Status

- Only show models with free chat enabled
- Only show models with free chat disabled
- Show all models

Select payment types:

4. Payout type What's this	5. Customer pricing	6. Optional Tracking Codes What's this
<ul style="list-style-type: none">Per Sign UpRevsharePay Per Sale	<ul style="list-style-type: none">\$4.99 TrialFree LifetimeFree Lifetime	Code 1: <input type="text"/> Code 2: <input type="text"/>

Generate Affiliate URL and Copy it:

Linking Code:

http://www.webcams.com/affiliate/wca_promo.php?action=onlinemodelsrssfeed&reseller=edcams&rev=0&type=1&misc1=&misc2=&link_type=rss&

Generate code

Now paste the Linking Code into the new category page:

```

18      <!-- begin listings -->
19      <?php
20      require_once('webcams/list.php');
21      $feed_url = 'PUT ONLINE MODELS RSS FEED URL HERE';
22      $models = $this::parse_online_models($feed_url);
23      foreach($models as $model) {
24          echo $this::render_listing($model, "listings.php"); ?>
25      }
26      <?php

```

Replace
PUT ONLINE MODELS
FEED URL HERE
with your affiliate URL

That's it for **category-template.php**.

You can build an entire site with just the category pages. If you want however, you can build hundreds of extra pages with specific model profiles. Here's how..

model-template.php – (Optional)

Use this template to make specific model pages.

Instructions

Login to your Webcams affiliate control panel and go to the **Promo Tools** page.

Now click on **Model Profile Links**:

Now we are at the page where we will select a model and get the affiliate code:

Select Your Preferences and click the Display Results button:

The screenshot shows a multi-step form for selecting preferences. Step 1, 'Choose profile landing page', has a dropdown menu with options like 'Amateur Profile 1' through 'Black & Pink 3'. Step 2, 'Pick your media categories', has a list with 'Blondes' selected. Step 3, 'Payout type', has 'Pay Per Sale' selected. Step 4, 'Customer pricing', has 'Free Lifetime' selected. Step 5, 'Optional Tracking Codes', has two empty input fields. A 'Landing Page Preview' window shows a model's profile with details like name, age, sex, and height. At the bottom, a 'Display Results' button is highlighted with a red box, and a red arrow points to it from another red box labeled 'Display Results Button'.

After the Display Results button is clicked, the results will be displayed on the same page immediately below the Display Results button.

When you find a model you would like to use, make a copy of **model-template.php** and name the file to reflect the Screen Name or the model you have chosen.

The screenshot shows a model's profile for 'SimplyHot'. It includes a photo of the model's back, a rating of 8.6/10, and a 'Screen Name' label. Below the photo are links for 'Model Images', 'Model Movies', 'Picture gallery zip', 'Media XML dump', and 'Delimited file'. A 'Copy this Link' button is highlighted with a red box, and a red arrow points to it from another red box labeled 'Copy this Link'. The 'Linking Codes' section contains a 'Profile' link and an 'RSS Feed' link, both highlighted with red boxes.

For example, if the Screen Name of the model is **SimplyHot**, you would name the page something like **SimplyHot.php** or **simplyhot.php**.

After you have made a new page, copy the RSS Feed link and paste into the page:

```

3 <?php
4 require_once('webcams/list.php');
5 $feed_url = 'PUT MODEL PROFILE RSS FEED LINKING CODE HERE';
6 $models = WebcamsRSS::parse_online_models($feed_url);
7 foreach($models as $model) {
8   ?>
9   <h1>
10  <h2>
11
12  <META name="description" content="<?php echo $model->about

```

**Replace
PUT MODEL PROFILE RSS FEED LINKING CODE HERE
with your affiliate RSS Feed URL**

That's it for **model-template.php**.

inc/header.php

Edit **header.php** to add your site name and site navigation links.

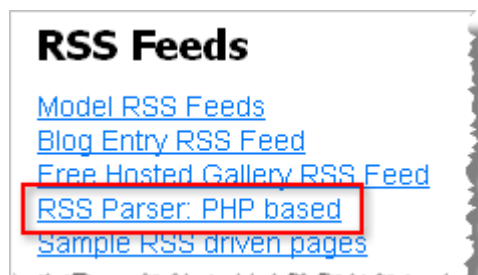

inc/footer.php

Edit **footer.php** to add your site navigation links and copyright info.

inc/listings.php - (advanced/optional)

Controls the listings layout displayed on pages created with **category-template.php**.
Add/delete parameters you would like displayed.

For a list of available parameters, login to your Webcams affiliate control panel and go to the **Promo Tools** page, then click on **RSS Parser: PHP Based**:

Then click on Online **model & model profile feed parser**:

Promo Tools

RSS Feed Parsers

[Online model & model profile feed parser](#)

Use this parser to create a customized list of online model listings at the end of your webcam site. With beginner HTML skills...

Use **only** the PHP code under **Online Model Feed Tags Available** for listings.php.

Online Model Feed Tags Available	
Actual PHP Code	Instructions
<code><?php echo \$model->screen_name ?></code>	Displays a model screen name
<code><?php echo \$model->model_id ?></code>	Numeric model ID of the performer
<code><?php echo \$model->mean_rating ?></code>	Average rating by users
<code><?php echo \$model->num_ratings ?></code>	Displays the number of ratings for a model

Use These Codes

inc/models.php (advanced/optional)

Controls the listings layout displayed on pages created with **model-template.php**. Add/delete parameters you would like displayed.

For a list of available parameters, follow the previous instructions except **only** use PHP codes under **Model Profile Feed Tags Available** for models.php.

Model Profile Feed Tags Available	
Actual PHP Code	
<code><?php echo \$model->screen_name ?></code>	Model's

Note: Some of the PHP codes for the Online Model Feed are the same as the Model Profile Feed while there is extra code available for the Model Profile Feed. **Do not** mix it up by placing Model Profile Feed Code into listings.php.

style.css

Controls the appearance of the entire site. Edit this file to change colors, font styles, font sizes, page width, hyperlink colors, hyperlink behavior, etc.

For help with colors, visit: www.htmlcolorcodes.org

For help with CSS, visit: <http://www.htmlhelp.com/reference/css/properties.html>

It is suggested that you first build the site, get some traffic, make some money, then play around with the colors, fonts etc.

webcams/list.php – (Don't Edit)

This is the PHP script that displays the RSS Feeds onto your pages. Nothing needs to be changed within this file. It just needs to be on your site.

This software is released under the terms of the GNU General Public License V2: <http://www.opensource.org/licenses/gpl-2.0.php>, which means that it is Free software.

readme.txt

Explains that this template is Free to use to make personal or commercial websites.

All that is required to legally use this template is to link back to www.freewebtemplates.me in the footer.

This template is released under the Creative Commons Attribution License: <http://creativecommons.org/licenses/by/2.5/au/>

Tips

How To Get Started with Traffic

After you build your new webcam site, you will need to get traffic to the site. Here's a few proven ways to get started with traffic.

Forum Signature Links

Join a few Adult Webmaster Forums, participate in discussions and add your website URL to your forum signature. Never post your URL into your actual posts, only put it in your signature.

Doing this will allow search engines to spider your web site and increase your link popularity which is the secret to Search Engine Optimization.

Blog Comments

Post comments on Adult related blogs. Only post comments that are relevant to the post and never add your URL to the comment itself, only add your URL to the URL field.

While some say that spiders don't crawl comment poster URL's, others say they do.

This is another way of increasing your link popularity.

Google Adwords

You can buy traffic to your web site by participating in the [Google Adwords](#) program.

Warning: Please do not do this until you read some books and articles on the subject or you will waste all your money without making enough profit.

A good place to start would be to get some Free tips on Adwords at:
<http://www.perrymarshall.com/google/>

Perry also has a good book on the subject called:
The Definitive Guide To Google Adwords

Useful Adult Webmaster Forum

Join the [World Dating Partners](#) Affiliate program and participate in their affiliate forums. There is a lot of important stuff to learn about getting Adult traffic at these forums.

Final Tip

This template is designed to get your web site traffic because of the auto-updating nature of the RSS feeds. For this reason, the more link popularity you get by getting links from other sites, the more Free traffic you will get from the search engines.
